CHOOSE SMART/AUTOMATIC KEY PROGRAMMING CHOOSE AUTEL

Autel smart/automatic key programming process makes your work much easier

IM608

- Auto detect your vehicle immo system
- Auto read immo data
- Auto continue the smart key programming process

UPGRADE

VW/Audi | v4.10

MQB all models blade key all key lost via OBD

Notes: This function applies to all MQB blade key models with Autel IM series product (Including IM608/IM600, IM508/IM100 + XP400 and MaxiSys IM)

All key lost fee: 30 dollars per use

Car model example: **Audi A3 2015**

Tools needed:

- [Autel MaxiIM IM608](#) or [IM508](#) with [XP400](#) programmer
- **Blank MQB key** (original or aftermarket MQB remote)
- **MQB AKL subscription**, costs US\$30 for each car. The payment is done within the tablet from Autel server.
- Requires **network connection** as well.

*No dealer key can be made from Xhorse MQB remote. Use original or aftermarket remote.

Xhorse remote failed, here used aftermarket remote and complete key programming.

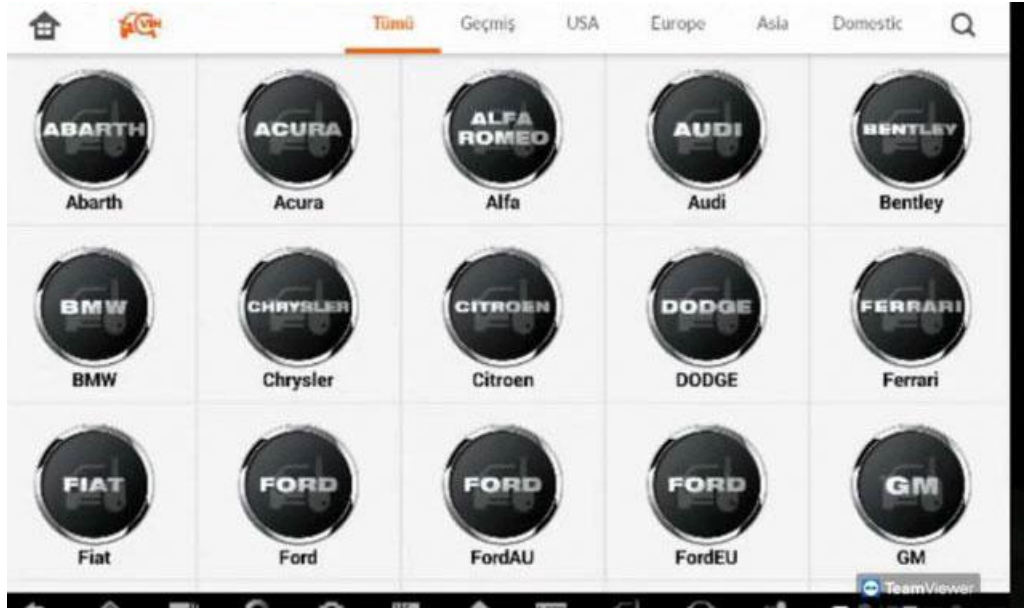

Guide:

Plug **Autel IM608** into the OBD2 port of the car.

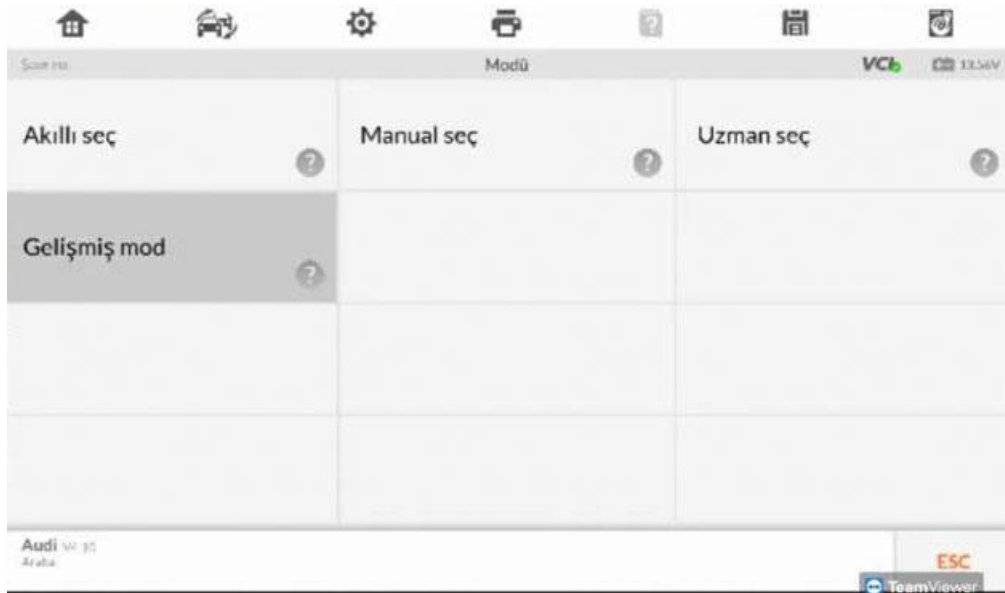

Turn on ignition, I notice the high temperature of engine.

Choose "Audi" on the Autel IM608.

Advanced mode

A3 /Q2 /S3 /RS3 / TT (MQB beta).

Information

Calculation is complete!

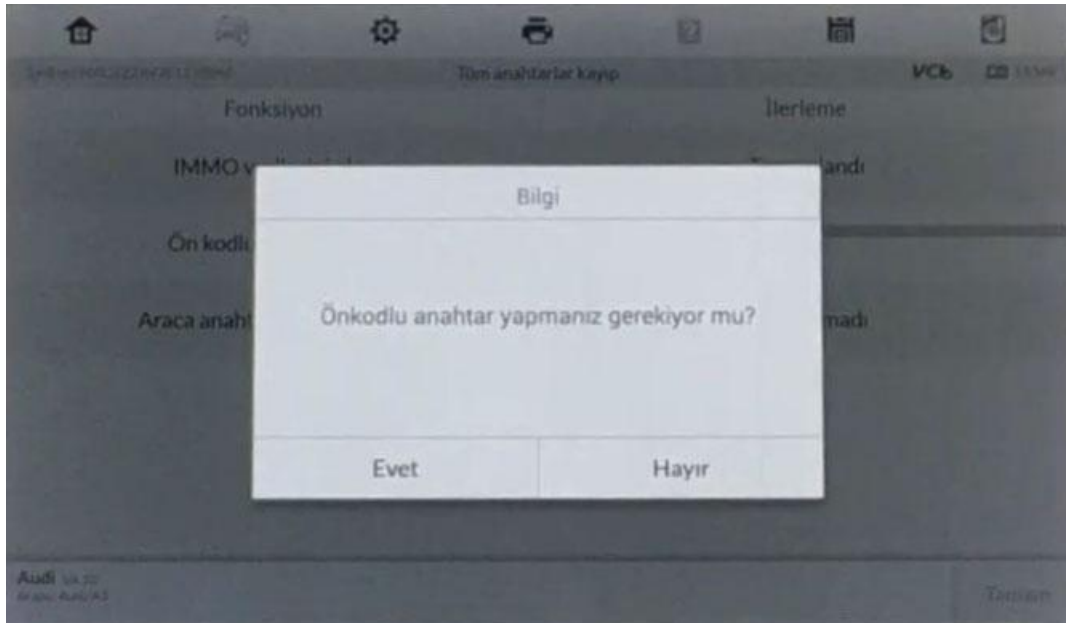

Please press the [OK] key of the next operation.

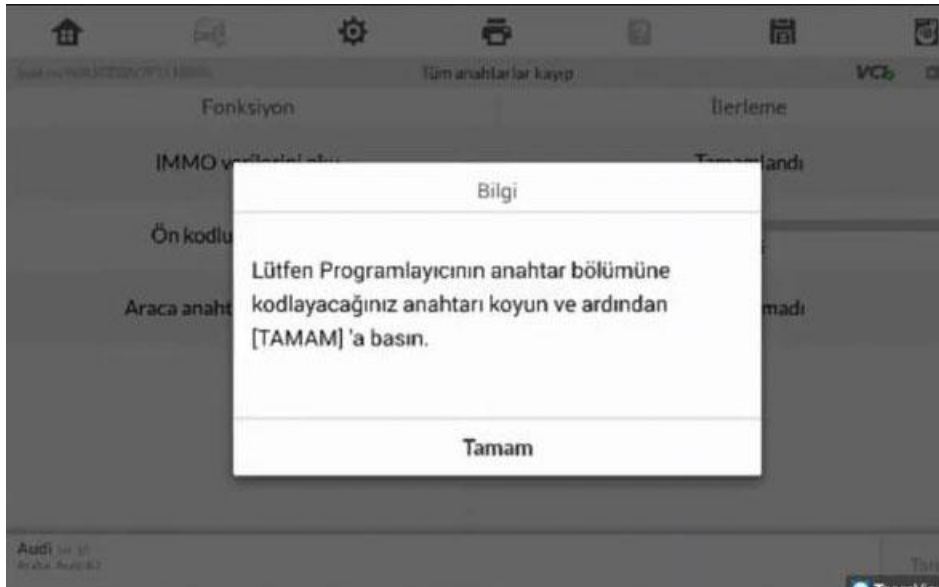

Make dealer key

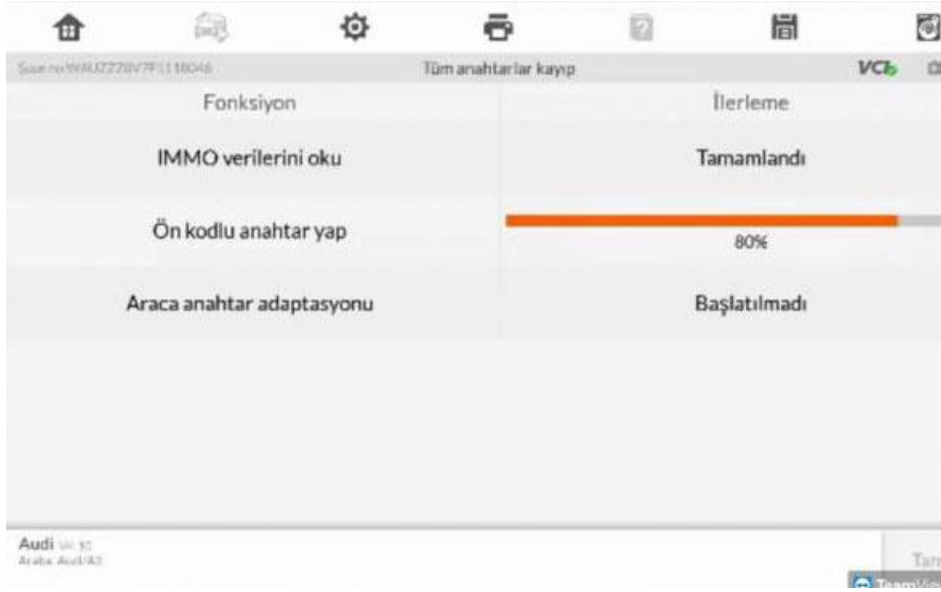

Do you need to make One more key?

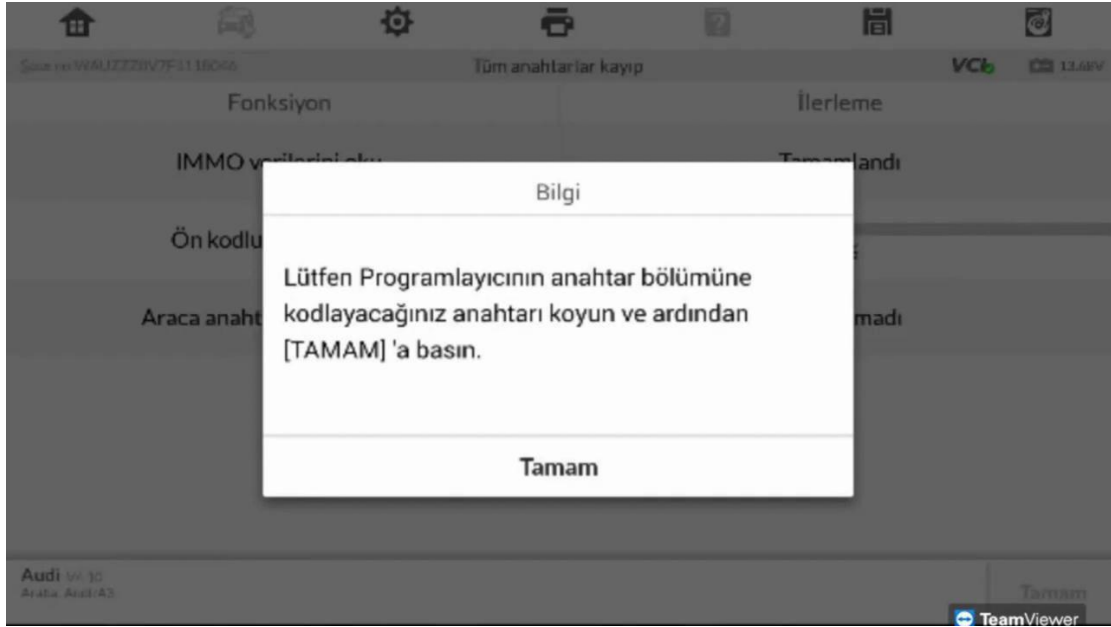

Put the key to code in the [Autel IM608 Programmer](#) key section, and then click [OK].

Make dealer key in process.

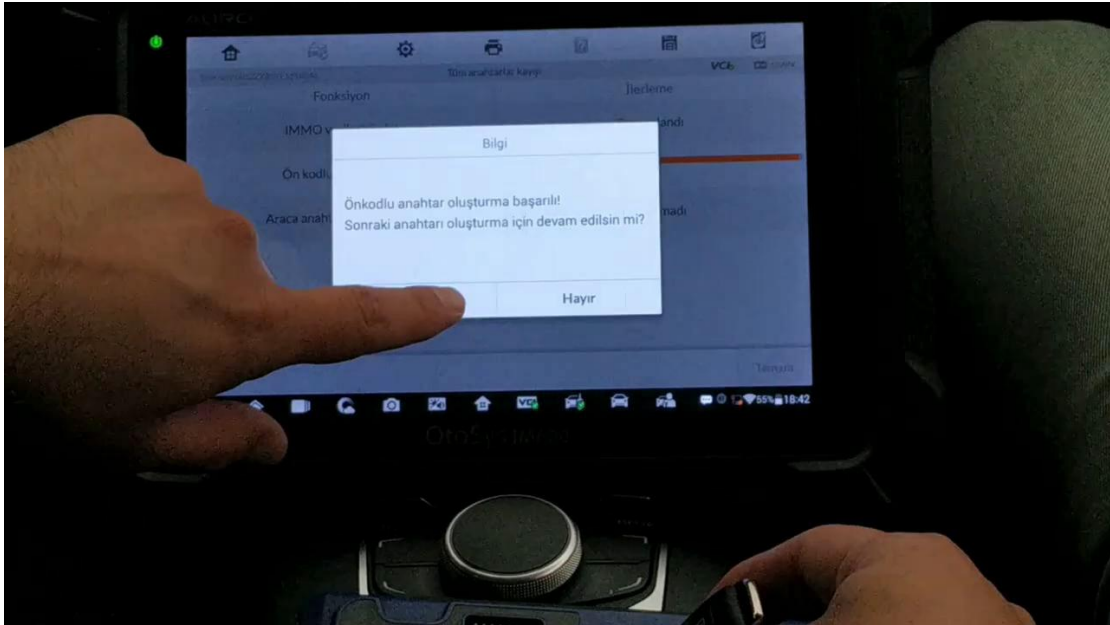

Please put the key to be programmed in the key hole of the Xp400 Programmer and then press [OK].

Make a dealer key success. Continue to create the next key?

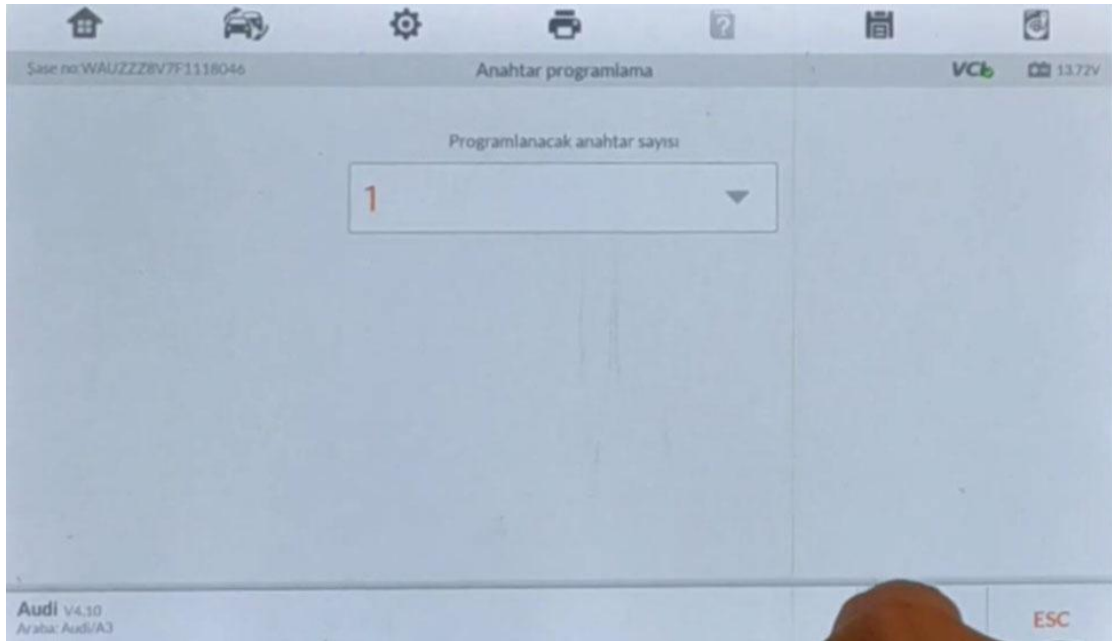

Is there a Kessy / Keyless in the vehicle?

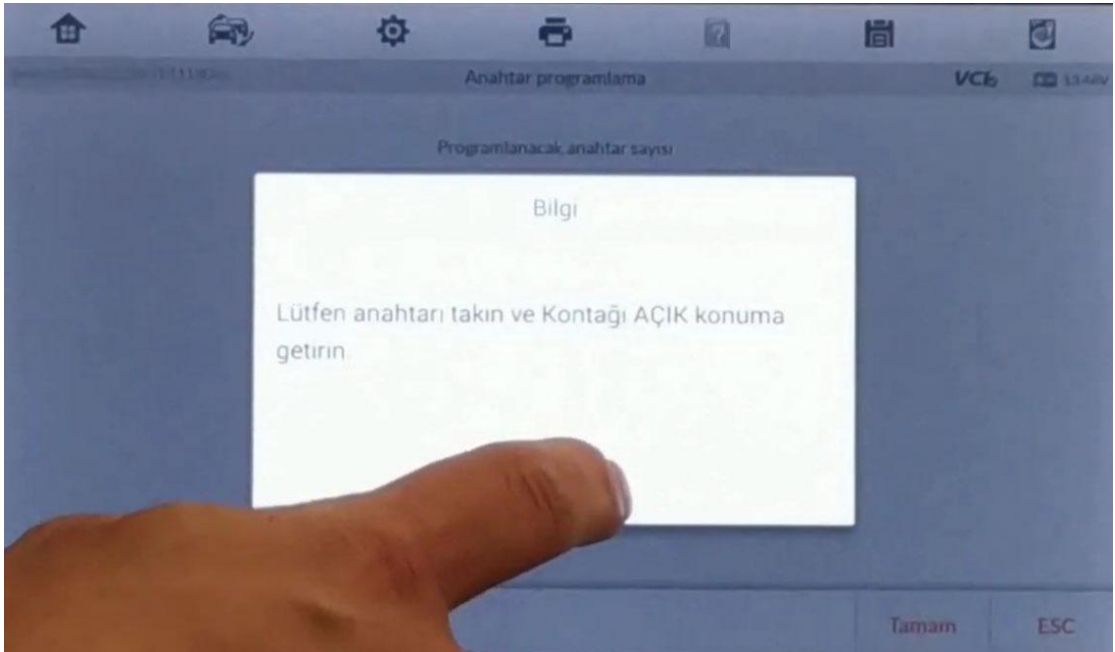

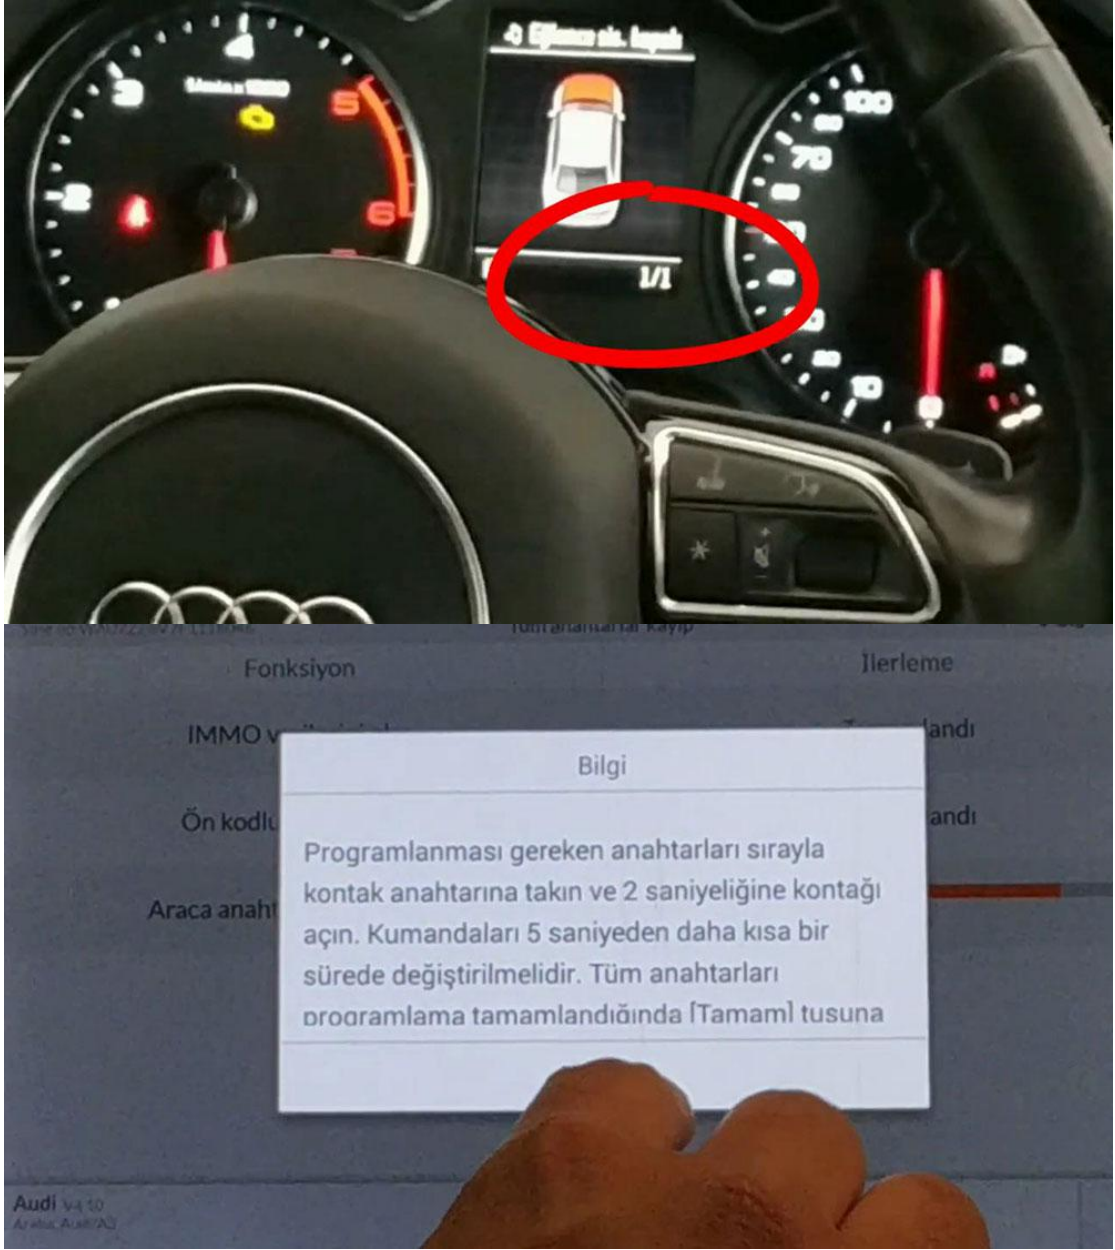

Enter number of keys to be programmed.

Please turn the ignition ON.

Insert the keys that need to be programmed into the ignition switch and turn on the ignition for 2 seconds. Their controls should be changed in less than 5 seconds. When programming all the keys is completed, click the OK button.

Done.
